

Report on the Inauguration of Students Union 2021

PSG Institute of Technology and Applied Research (PSG iTech) inducted the new office bearers for its Students' Union for the academic year 2021-2022 on 11. 10.21 (Monday). Dr G Chandramohan, Principal, welcomed the gathering and spoke about the various activities organized by Students' Union in the past. At the same time, he requested the clubs to organize more events for students to enhance their skills for stamping success in their desired career. Shri L Gopalakrishnan, Managing Trustee, PSG Institutions, delivered the presidential address and offered his felicitations. He requested the members to conduct more activities and help every student to enjoy their stay in the campus and take part in sports activities, which will help to stay physically fit.

Chief Guest of the event Mr Raja Gopal Sunkara IAS, Coimbatore City Municipal Commissioner congratulated all the newly selected office bearers of the Students' Union and requested the members to be ready to address the difficulties faced by students at any point of time. During the talk, he recalled some of his college day memories and shared some tips to excel in life. Also, he urged the members to have plans from day one and execute them before the completion of their tenure. Further, he appealed to them to utilize the time effectively and focus on both academic activities and extracurricular activities. Interestingly, he compared the City Corporation with the Students' Union in identifying, understanding and solving the problems faced by the people and students and shared the challenges involved in solving the problems. Then, he urged the members of the Students' Union to stay in touch with all the students and help them develop their unique skills required for their life.

Apart from these, an MoU was also signed between the PSG iTech and Coimbatore Smart City Limited (CSCL) with respect to implementing projects in Smart Cities mission of Government of India in Coimbatore City. PSG iTech will offer the intellectual capabilities of its faculty, as well as laboratory facilities, including necessary software, for providing significant inputs to CSCL in solving problems in the execution of projects under the Smart Cities mission, specifically in the areas of Design of NMT corridors, Surveying and restoration of water bodies,
